

Prof. Rabi'u Muhammad presenting his Inaugural Lecture

Physical Disability is no Barrier to Physical Activities ...Prof. Rabi'u Muhammad

By Fausat A. Opayomi

Physical activities can help in directing the harmonious development of the body for mentally and physically defective persons to develop adequately, a Professor of Adapted Physical Education, Rabi'u Muhammad, has said.

Presenting the 44th Professorial Inaugural Lecture, titled “**Exercise and Sports for the Atypical Persons: A Multidimensional Analysis**” on Thursday, 8th August, 2019 at Musa Abdullahi Auditorium, he pointed out that a disabled person required an adapted physical education programme.

Professor Muhammad, a Professor in the Department of Physical and Health Education of Bayero University, Kano, said atypical persons were those with disabilities, such as visual and learning impairment, mental retardation, motor orthopedic, learning disabilities and communication disorder and, as such, their performance deviated from the normal trend, as a result of which they required the adapted physical education programme.

He described adapted physical education as the art and science of developing, implementing and monitoring a carefully designed instructional programme for a learner with disability based on a comprehensive assessment to give him or her the necessary skills for a life time rich in leisure, recreation and sport experience

to enhance physical fitness and wellness. He, therefore, called on physical educators who had done excellently well in helping healthy and gifted persons to become healthier and more skilled to do more in helping those with disabilities to develop their optimum physical capacities, which should help in improving their physical and mental wellbeing.

Professor Muhammad reiterated the fact that there was a barrier in the participation of persons with disability in physical activities and sports performance because of discrimination. As such, they were underrepresented. Adding that, in spite of the discrimination Nigerian athletes with disabilities faced, they had brought glory to Nigeria at Paralympic Games, winning more medals than their able-bodied counterparts.

Earlier the Vice Chancellor, Professor Muhammad Yahuza Bello, in his remarks, said the number of Professors that had presented their inaugural lectures was small compared to the number of Professors in the University and that the University management did not mind taking two lectures per day on the lecture day so as to get more Professors on board. He also commended the Inaugural Lecture Committee for doing tremendously well in the discharge of their duties, but urged them to sustain the tempo.

47 Staff on Fellowship Share N17 Million Research Grant

By Bala G. Abdullahi

Over 17 million naira was approved by the Vice Chancellor, Professor Muhammad Yahuza Bello, for disbursement as research grants to 47 staff on fellowship who are pursuing higher degrees in various universities.

A statement signed by the Director, Directorate of Research, Innovation and Partnership (DRIP), Professor Ibrahim Ahmad Rufa'i, said the Standing Committee on Research and Publication of the Directorate had screened the 47 proposals for content and compliance with the University's guidelines on research grants and found the proposals apt.

According to the statement, 30 of the beneficiaries were pursuing PhD programmes and the remaining 17 staff on fellowship were undergoing Master Degree programmes. Both staff are expected to complete their programmes of study in 2020/2021.

It said that following full satisfaction of the fulfilment of the guidelines for the grants by the candidates, the Directorate had recommended the applicants to be awarded the research grants and were happy that the Vice Chancellor had graciously approved it.

Meanwhile, the Vice Chancellor, Professor Bello, had approved the disbursement of the sum of 30,000 naira each as theses grants to three PhD students. The approval was sequel to the recommendation of the Board of Research, Innovation and Partnership (DRIP), according to Professor Rufa'i.

Below is the list of the Degree Oriented Research beneficiaries:

Dr. Ali Idris Re-appointed as Head of Department

The Vice Chancellor, Professor Muhammad Yahuza Bello, has approved the re-appointment of Dr. Ali Idris as the Head,

Department of Science and Technology Education, for another two years commencing from October 2, 2019.

MACOSA 18/19 Provide 10 Concrete Seats

In their effort to supplement the effort of the University Management, the 2018/2019 Executive of Mass Communication Students Association (MACOSA), Bayero University, Kano has provided a first ever infrastructural development project of 10 set of concrete seats for students.

In his remark, the Head of department, Dr. Haruna Isma'il, urged other Departmental Associations to emulate the MACOSA gesture.

Similarly, the coordinator of MACOSA, Malam Saminu

Umar, expressed satisfaction with the leadership of the association, saying that "This was first of its kind for MACOSA to provide seating facilities to students". He also called on the incoming MACOSA to emulate and continue from where the current administration stopped.

However, the president of the Association, Malam Abbas Umar, stated that this was part of the electioneering promises made, adding that more and more of such physical project were coming for the development of the Department and University in general.

Innovation and Critical Thinking Are Instrumental to Societal Growth

... Sheikh Prof. Abubakar, Prof. Ayagi Call for Unity

By Lamara Garba

Scholars in tertiary institutions must vigorously engage in innovation and critical thinking for out of the box solutions with a view to bailing out our country from the quagmire of under-development occasioned by the myriad of problems facing the society, the Chief Imam of BUK New Campus Mosque, Professor Sheikh Auwal Abubakar, has said.

Delivering his sermon on Sunday, 11th August, 2019

Professor Auwal Abubakar
Chief Imam of New Campus Mosque

Professor Sani Musa Ayagi
Chief Imam of Old Campus Mosque

during the Eid-el-Kabir prayer, the cleric, however, said this could only be attained through the acquisition of knowledge by members of the society. He said any nation that relegated education to the background would forever remain backward and underdeveloped.

“Universities and other tertiary institutions must be up and doing. We must reawaken from our slumber and be more innovative in our thinking faculty. Our scholars should focus on indepth research in science and technology and other aspects of how best to be self-reliant, productive and development oriented for the overall interest of our nation,” he declared.

Department of International Law Organizes 2nd Annual Quiz

By Adamu Garba

The Department of International Law and Jurisprudence has organized an annual legal mind quiz competition to test the intellectual capacity of students outside the classroom and promote the spirit of sportsmanship amongst them.

Solace Chambers emerged winner of this year's competition while Al-Maslah and Liberty Chambers became first and second runners, respectively.

The competition, which was held at the Court Room of the Faculty of Law, on Wednesday, 7th August, 2019 comprised of four students' chambers, namely; Al-Maslah, Equity, Liberty and Solace that participated in the rigorous quiz competition, answering questions that cut across international law, constitutional law and

Professor Abubakar said it was disheartening that our scholars in universities could not afford to engage in meaningful research that would advance the development agenda so that the country could prosper and grow.

In particular, he said the North would continue to lag behind as long as “we shall not have peace, unity, and communal services. At the moment, we are in a disarray, everyone is concerned only about himself and members of his immediate family alone, and this is a negative trend which would be disastrous to our collective interest as a people and a nation.”

He also harped on the need for unity, brotherhood, community service and sacrifice in line with the spirit of the eid-el-Kabir celebration.

Also, the Chief Imam of the Old Campus Mosque, Professor Sani Musa Ayagi, has called on Muslims to be united and love one another. In his sermon during the eid-prayer at the Old Campus, he noted that without unity, peace and harmonious coexistence, there would be no development.

Professor Giwa who expressed concern at the growing incidences of family disputes, which often result in killings, said lack of adherence to the teaching of the Qur'an and the Sunnah of the holy Prophet were mainly responsible for this negative trend. According to him, there must be mutual respect amongst couples as a way of promoting good family values and proper child upbringing for a better society.

Equally, he called on the youth to be self-reliant and hardworking and to enroll in schools, so as to be productive and contributing to the development of the country. “Islam is a complete way of life. We have to be our brother's keepers.”

Shari'a Law.

The representative of the Vice Chancellor and also Director, Academic Planning, Professor Bala Sidi Ali, who declared the competition open, disclosed that the quiz competition would help to improve the capacity of the students and also prepare them for future challenges.

Professor Ali and the Dean, Faculty of Clinical Sciences Professor Mahmoud Sani Umar personally donated the sum of ten thousand naira (N10,000.00) each to the winners.

In his remarks, the Dean, Faculty of Law, Professor Muhammad Shuaib (Zunnurain), commended the Department of International Law for organizing such an

intellectual competition, which he described as unprecedented and thereby challenged other Departments of the Faculty to emulate it.

The Head of Department of International Law and Jurisprudence, Professor B.A. Haruna, expressed gratitude to the Vice Chancellor for the support given to the Faculty in all its activities. He disclosed that the competition was among several other competitions organized by the Department. He stated that immediately after the quiz, the Department would also organize an inter-departmental debate, which would follow in a week or two.

Others who graced the occasion were the Dean, Faculty of Clinical Sciences, Professor Umar; the Deputy Dean, Postgraduate School, Professor Abdul Iguda; the Former Registrar, Dr. Sani Ibrahim Amin; the H.O.D. Public Law, Dr. Aisha Haruna and the representative of the University Librarian, Zainab

Ibrahim Salisu, and many more.

BUK's Brycoal Team Fully Sponsored for Global Entrepreneurship Challenge in UK - VC

By Nura Garba

Against publications from some sections of the media that the Bayero University team, Brycoal, which is currently in the United Kingdom for a global entrepreneurship challenge had struggled financially for visa and other logistics, the story was a misrepresentation of truth as the University fully sponsored the team.

Vice Chancellor, Professor Muhammad Yahuza Bello, made a categorical statement on Thursday, 15th August, 2019 in an interview on the veracity of the information, which suggested that the BUK Team sought for assistance from philanthropic individuals and organizations outside the University.

“Many people called me asking on why the University could not afford to pay for the team's logistics despite qualifying to represent the University at the global stage? I explained this in detail that the story was not correct, as the University fully sponsored them to the United Kingdom,” he explained.

Professor Bello further stated that “when we read the story, first we were happy that BUK was recognized globally, but we understood that the information was not correct.”

The Vice Chancellor said that the staff supervisors of the team wrote to the University Management requesting for their logistics, which was approved and paid. On the issue of visa, he said that they didn't know that getting the UK visa was becoming more difficult and the problem was not from the University.

Professor Bello emphasized that they applied for the UK visa at a short time but we were told that for one to get the visa within a short time one must pay additional charges to enable one to be interviewed. He said even at that stage the University agreed to pay the additional charges. “We advised one of the team members to apply online so that we would know the additional charges. We said we would use that application to pay for the additional charges and pay for the other members of the team and this is what we did,” said the Vice Chancellor.

“As a matter of fact, the University fully paid for their visa fees, transportation and other logistics,” the Vice Chancellor emphasized.

It will be recalled that a team of three undergraduate students of BUK made it onto the 40 teams shortlist for the \$1 million Hult Prize, the world's largest student competition. The competition is about creating market-ready solutions to the pressing needs of humanity, while maintaining balance between profit and social impact. Its goals are in line with

the Sustainable Development Goals (SDGs) of the United Nations.

The students, Ubaidurrahman Sulaiman, Mustapha Sani Abdullahi and Abdulhafeez Adebayo, won the contest at the campus level with their innovation and at the regional level in Abuja.

The team invented a solar-powered device that allows for crop waste to be utilized for job creation in rural communities through the production of charcoal briquettes.

VC, Prof. M. Y. Bello (middle) during the interview

BUK Gets Direct Satellite Television Broadcast Licence

By Lamara Garba

NBC Management with BUK Team at NBC Headquarters, Abuja

The National Broadcasting Commission (NBC) has granted Television Licence for Direct Satellite Broadcast (DSB) to Bayero University, Kano with a view to commencing Television Broadcast in the Faculty of Communication.

Presenting the Television Licence to the Vice Chancellor of the University Professor Muhammad Yahuza Bello on Tuesday, 6th August, 2019 in Abuja, the Director General of NBC, Mallam Ishaq Modibbo Kawu, said the licence would afford the institution to start television broadcast for general purposes as well as for training its students.

According to him, the NBC had a long existing partnership with BUK in the area of broadcast journalism.

Already, he said BUK had a community radio station and with this TV licence it is hoped that graduates of the institution will come out ready-made products.

In his remarks, the Vice Chancellor, Professor Muhammad Yahuza Bello, expressed delight to the management of the NBC for the DSB licence, pointing out that the desire to provide the best teaching materials informed the decision for the securing of the operational licence.

He disclosed that Bayero University had been running a degree programme in Mass communication for more than four decades thereby making it one of the leading institutions offering the course in Nigeria. He assured that the university would abide by the rules and guidelines of operating the TV station.

Also explaining on the implication of the licence, the pioneer Dean of the Faculty of Communication, and now Dean of the School of Post Graduate Studies, Professor Umaru Pate said the station would give adequate practical training to our students in journalism practice, particularly broadcasting.

The Vice Chancellor was in company the Registrar, Hajiya Fatima Binta Mohammed and the Dean of the School of Post Graduate Studies, Professor Umaru A Pate.
